(you can download the font at <http://www.myfonts.com/fonts/adobe/helvetica-neue/>)

**Lobster** : <http://www.dafont.com/lobster.font>

Layer guide

### How to managing layer in Photoshop?

Here are the standard techniques that you can do to customize the file :

- 1 To show or hide the layers, just easily click the 'eye' mark.
- 2 If you want to expand layer, click the little arrow beside the layer name.
- 3 Click the Fx arrow to see the adjustment of layer's style/effects.
- 4 If you want to hide the wood texture or any effect, simply click the eye mark beside the effect's name (just like the #1) or drag the effect to the little trash icon at the bottom corner of layer panel to remove.
- 5 To change the color in each element, you can click the color box beside the layer name and choose the desire unlimited colors OR double click the 'color overlay' effect then click the color box beside the blend mode option

Done!

### That's it!
